

ROTATIONAL POLY MOULDER – SINGLETON

Rapid Spray – the “leaders in fluid and liquid management” are looking for a new team member and we require a “moulder”. Whilst we would prefer someone with experience in rotational moulding – we are happy to up-skill you – its more about having the right attitude.

To apply, you must have a **current FLT and car licence**. This is a permanent full-time (38+) position for the right person. Paying above award wages with no weekend work requirements.

Whilst previous experience in “Roto-Moulding and/or Manufacturing is desirable, you will be trained in the correct methods of loading moulds with poly powder, loading moulds onto trolleys to send into ovens, overhead crane operations, releasing products from moulds and testing the finished products for quality.

You will also need:

- Comply with all PPE and safety requirements (Steel caps, Hi-Vis shirt, Hard hat, Ear protection)
- Physically fit in an active work environment
- Solid analytical and math skills to select product quantities.
- Able to follow written instruction and computer literate (reading and understanding English)
- Proven reliable and consistent work ethic
- Happy to be part of a small and driven team

This role is based on-site at Singleton, with on street parking (no public transport)

If you have these skills and are ready to move your career forward, send a brief cover letter and your resume outlining your skills to careers@rapidspray.net or hit the “apply now” button.

This role is to be filled ASAP and interviewing will start immediately.
