

Rotational Poly Moulder – Singleton

Rapid Spray – we are the “leaders in fluid and liquid management” and we are currently looking for a motivated standout colleague to join our roto-moulding team. Whilst previous experience is always an advantage, we feel that someone with the right attitude, quest for success and a want to learn from an experienced team in a growing organisation is the person we are looking for.

To apply, you will have a **current FLT (Forklift) and car licence**. This is a permanent full-time (38+) position for you, paying above award wages with no weekend work requirements to help you with your personal work life balance. Rapid Spray is an equal opportunity employer.

You will receive on the job training in the correct manufacturing processes and methods required to be successful in rotational moulding, including the safe loading of moulds with poly powder, overhead crane operations, loading moulds onto trolleys, releasing products from moulds and testing the finished products for quality conformance.

What are we looking for from you ?:

- Aligned with all PPE and safety requirements (Steel caps, Hi-Vis shirt, Hard hat, Ear protection). Looking after yours and your work mates safety is important to us.
- we expect you to be Physically fit in an active and fun work environment
- Sound analytical and math skills to select and weigh correct product quantities.
- be able to follow written and verbal instruction as well as being computer-literate for entry of quality data.
- Proven reliable and with a consistent work ethic. We want you to want to come to work every single day
- we want you to have pride in your work and focused on meeting customer happiness.
- Happy to be part of a small, successful driven team.
- Have the opportunity to share in our growing business and success.

The role is based on site at our modern Singleton facility, with on street parking and excellent amenities for you to enjoy (no public transport)

If you feel that you have these skills and are ready to move your career forward, please send a brief cover letter and your resume outlining your skills to careers@rapidspray.net or hit the “apply now” button.

This role is to be filled ASAP and interviewing will start immediately.
