Potable Water Suitability Policy – Rapid Spray Australian Made Cartage Tanks

Rapid Spray is committed to providing safe and reliable cartage solutions for a wide range of applications, including the storage and transport of potable (drinking) water.

All Rapid Spray Australian Made Cartage Tanks are manufactured using rotationally moulded, food-grade polyethylene powder. This material has been:

- Approved for food contact under U.S. FDA Regulation 21 CFR 177.1520; and
- Certified for contact with drinking water in accordance with AS/NZS 4020 – Testing of Products for Use in Contact with Drinking Water.

As a result, our Australian Made Cartage Tanks are suitable for the storage and transport of potable water, provided that tanks are used, cleaned, and maintained according to manufacturer guidelines to prevent contamination.

Rapid Spray continues to uphold strict quality assurance and compliance standards to ensure our products meet both Australian and international food and water safety requirements.
